With the addition of three FAA licensed UAS drone pilots at Ninyo & Moore, we are pleased to announce our new drone services to better serve our client's needs. Drone services can be utilized to add another technical dimension to your Environmental, Geotechnical, Forensic, and Geophysical projects.

Our capabilities include:

- Document site conditions with High Definition aerial imagery and UHD 4K video
- Investigate large or inaccessible project areas or structures with live video feed
- Offer before, during, and after representation during scope of project
- Combine aerial imagery for the entire site as a spatially referenced geoTiff
- Generate profiles and topographic surveys for use in ArcGIS, CAD, and more
- View elevation contour maps, 3D models, and HD imagery easily using shareable internet link
- Create 3D attribute-based Point Cloud models in LiDAR-native LAS and XYZ data formats
- Export to Digital Terrain Model (DTM) and Digital Elevation Model (DEM) formats
- Provide near survey-grade quality (+/- 1-2cm) topographic surveys with advanced services

Topographic Survey of Concourse Park, Irvine, California
