

Mold Assessment

La Jolla Mount Soledad Landslide

Firm Background

Established in San Diego in 1986, Ninyo & Moore is one of the largest engineering firms specializing in Geotechnical Engineering, Environmental Engineering and Materials Testing and Inspection Services. Engineering News Record (ENR) recognizes the firm as one of the Top 500 Design Firms in the United States.

Ninyo & Moore has fully equipped and certified in-house testing laboratories that offer full-service field and laboratory services for geotechnical design, and soil and materials testing projects.

Professional Staff

Ninyo & Moore's staff of 500 certified and registered professionals includes:

- Geotechnical engineers
- Civil engineers
- Engineering geologists
- Hydrogeologists
- Geophysicists
- Field technicians
- Special inspectors
- Environmental engineers
- Environmental scientists
- Industrial hygienists
- Asbestos consultants
- Safety professionals
- Indoor environmental consultants
- Microbial consultants
- Lead consultants
- Qualified SWPPP developers/practitioners
- Hazardous waste and regulatory compliance specialists

Locations

Ninyo & Moore has offices located in the western United States, including California, Arizona, Nevada, Colorado, Utah, and Texas.

Ninyo & Moore has performed numerous forensic evaluations on behalf of law firms, insurance companies, public agencies, and commercial and residential property owners. Our methodologies are proven effective in providing consistent evaluations and reasonable recommendations. Our geotechnical services provide evaluation of soil movement, construction claims, and other design and construction-related issues. Our environmental services provide evaluation of a multitude of indoor and outdoor hazardous materials and air quality issues.

Geotechnical Services

- Basement seepage
- Concrete degradation
- Cracked slabs/foundation
- Erosion
- Expansive soils
- Landslides
- Pavement distress
- Corrosion
- Retaining walls
- Sinkholes
- Soil settlement

Environmental Services

- Accident analysis
- Airborne contaminant monitoring
- Asbestos/lead surveys
- Biological hazards assessments
- Construction safety compliance
- Air quality
- Mold assessment
- Noise monitoring
- OSHA compliance
- Radiological material surveys

Forensic Evaluations

- Construction claims
- Construction defect
- Earthquake/tectonic fault evaluations
- Engineering geology
- Expert witness services
- Feasibility evaluations
- Insurance claims
- Geophysical studies
- Geotechnical engineering
- Hazardous materials
- Homebuilder customer service
- Materials testing and inspection
- Third party reviews
