

## Firm Background

Established in San Diego in 1986, Ninyo & Moore is one of the largest engineering firms specializing in Geotechnical Engineering, Environmental Engineering and Materials Testing and Inspection Services. Engineering News Record (ENR) recognizes the firm as one of the Top 500 Design Firms in the United States.

Ninyo & Moore has fully equipped and certified in-house testing laboratories that offer full-service field and laboratory services for geotechnical design, and soil and materials testing projects.

## Professional Staff

Ninyo & Moore's staff of 500 certified and registered professionals includes:

- Geotechnical engineers
- Civil engineers
- Engineering geologists
- Hydrogeologists
- Geophysicists
- Field technicians
- Special inspectors
- Environmental engineers
- Environmental scientists
- Industrial hygienists
- Asbestos consultants
- Safety professionals
- Indoor environmental consultants
- Microbial consultants
- Lead consultants
- Qualified SWPPP developers/practitioners
- Hazardous waste and regulatory compliance specialists

## Locations

Ninyo & Moore has offices located in the western United States, including California, Arizona, Nevada, Colorado, Utah, and Texas.

## Current California Stormwater General Permits

Construction General Permit	2009-0009-DWQ	Municipal (MS4) General Permit	2013-0001-DWQ
Industrial General Permit	2014-0057-DWQ	Caltrans General Permit	2012-0011-DWQ

Stormwater is a sustainable water resource, especially during periods of drought. Don't let stormwater pollution become a liability for your facility. Ninyo & Moore can assist you in preserving California's water resources by providing:

- **Stormwater Training and Awareness** – Industrial Facility Operators, you only have one chance at Baseline Status! So get trained and know the rules to avoid Level 1 designation. We will train your personnel to:
  - Recognize common stormwater pollutant sources
  - Conduct facility inspections
  - Perform stormwater sampling
  - Install/inspect/upgrade BMPs
  - Understand/implement SWPPP requirements
- **Permit Compliance** – Setting up SMARTS, Notice of Intent, SWPPP development/implementation, REAPs, annual reports, impaired 303(d) listed waterbodies, Notice of Termination
- **Monitoring and Inspections** – Evaluating facility drainage areas, recognizing authorized and unauthorized non-stormwater discharges, performing BMP inspections (including volume and flow based treatment BMPs)
- **Stormwater Sampling** - Sampling procedures; sampling equipment; laboratory procedures (sample containers, chain-of-custody, analytical methods, analytical results interpretation); reporting; exceedance response actions
- **Qualifying Storm Events (QSE)** - e-mail/text notification of weather forecasts, Doppler radar, potential QSEs
- **Stormwater Design Services** - Green infrastructure, water capture, low impact development, bioretention, permeable pavers, post-construction requirements

Trained Staff – Regardless of your stormwater program needs, Ninyo & Moore's trained staff can help you. Our qualified SWPPP practitioners (QSPs), qualified SWPPP developers (QSDs), Qualified Industrial Storm Water Practitioner (QISP), and field staff will provide the level of expertise that you need to comply with California's extensive, and sometimes complex stormwater regulations.
